

# THE STRUCTURE OF KOI CORNER'S REUSABLE DRINK CONTAINER

## Materials:

Stainless steel with a powder coat. This acts as an anti-slip layer that promotes a secure grip.

Reusable silicone with a soft texture, providing a comfortable and easy grip.

18/8

18/8 Food-Grade  
Stainless Steel

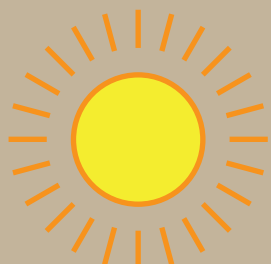

Construct from high quality materials, preventing the bottle to rust, or transfer flavour.

Non-slip rubber base, allow the drink container be stable while standing upright.

## Double Wall Insulation

The double wall technology prevents condensation on the outside of the bottle so you don't need a coaster. The design prevent heat transfer between the liquid inside the container and the temperature outside, allowing your drinks to maintain it's freshness for much longer!

Keeping drinks cold up to 24 hours  
Keeping drinks warm up to 6 hours

## Durable Power Coat

Powder Coated for a firm grip and to prevent condensation. Create more resistant and make the bottle for durable
